## **DETAILED ACTION**

### ***Status of the Claims***

1. Amendment filed March 03, 2006 has been entered. Claims 1-31 have been cancelled. Claims 32-62 have been added. Claims 32-62 are pending.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 32-38, Group I, drawn to method of operation in an IC, classified in class 438, subclass 218.
  - II. Claims 39-62, Group II, drawn to apparatus, classified in class 257, subclass 368.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the process of using the product as claimed can be practiced with another materially different product such as accessing charge stored in a capacitor of a DRAM wherein the capacitor is coupled to a transistor formed on the substrate.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Thus, is made final.

Art Unit: 2814

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species IIA, claims 39-46, an IC which require one deep n-well proximate p-type material.

Species IIB, claims 47-55, withdrawn, an IC which require two deep n-well at deferent depth, wherein the functionality of the instant n-wells do not depend-on a p-type material a ground reference.

Species IIC, claims 56-62, withdrawn, a deep n-well capacitor wherein the instant device can be seen as a trench capacitor formed in a n-well and its surface area determined the capacity.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2814

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
